

When Dr. Sudhir Sehgal joined the Huntsville Memorial medical staff, we not only added a doctor. We added a whole new specialty. That's because he's a board-certified pulmonologist — an expert in treating lung problems. For emphysema and COPD sufferers, that means specialized care and breathing therapy are available right here in Huntsville. Might be just the thing to help you catch your breath. And maybe even catch up with your four-legged buddy.

Down to earth and up to the minute.
