

New 3D Heart CT Scan

*CT imaging created
with you at heart!*

**Our new cardiac
imaging makes the
heart grow fonder.**

Old Heart CT Scan

If you need a heart scan, ask your doctor about the revolutionary GE Lightspeed® VCT XT configured system at Huntsville Memorial Hospital. Its stunning new technology has improved image quality. Your doctor gets the quality images he needs, while you get the care you can trust.

Key features:

- Cardiac computed tomography (CT) is a painless test that uses an x-ray machine to take clear, detailed pictures of your heart. This common test is used to look for problems in the heart.
- Produces 3D digital images
- A cardiac CT scan usually takes about 15 minutes to complete.

Down to earth and up to the minute.
