

We're just minutes away.

In 2009, the Huntsville Memorial Hospital Medical Clinic moved to its current location in the Robinson Creek Center at 521 IH-45 South, Suite 4, close to the hospital and other medical offices. Next time you have a health care need that's too minor for the ER but too major to postpone, keep us in mind. We'll be right here.

The Huntsville Memorial Hospital Medical Clinic is actively involved in the following programs:

- The Texas Vaccines for Children and Adults (TVFC)
- Walker County Hospital District Needy Care Program
- Community Screening Programs
- Department of State Health Services Programs
- Workers Compensation
- Department of Transportation Physicals and Drug Screenings
- Walker County Center for TB
- Annual Breast Screenings
- HMH Charity Care Program
- Diabetes Education
(For English and Spanish speaking patients.)
