

## Patient Comfort and High Field Performance That's Out Of This World

*Huntsville Memorial Hospital Outpatient Imaging Center's High-Field Open MRI provides a comfortable, non-claustrophobic environment during MRI exams.*

- Accommodates claustrophobic patients
- Wide patient table for comfortable, easy position for best image quality
- 660 lb. weight limit
- MRI stereo system - Bring your own CD or iPod to listen to during your scan
- 270 degree viewing angle for the best scanning experience
- 1.2T (1.2 Tesla) field strength magnet
- Two-way intercom systems
- Minimized patient time and patient discomfort with multiple coil connections
- Lower table allows for easy access by wheelchair patients
- Range of applications, including motion compensation
- Unobstructed views - *Helpful for pediatric patients so they can see you, touch you, and talk with you*

As the most powerful bore-less MRI system in the world, the Oasis open design provides unobstructed views to minimize anxiety while allowing for exceptional clinical images-just what your doctor needs for diagnosis.

Down to earth and up to the minute.
