

## Wound Care Center

Nearly 2 million people suffer from chronic, non-healing wounds caused by poor circulation, diabetes, compromised immune system and/or arterial disease.

There are many different types of wounds. Some are associated with complications from diabetes and other related vascular disorders. Other types include pressure sores and traumatic wounds. It can be very frustrating and time consuming to heal these wounds.

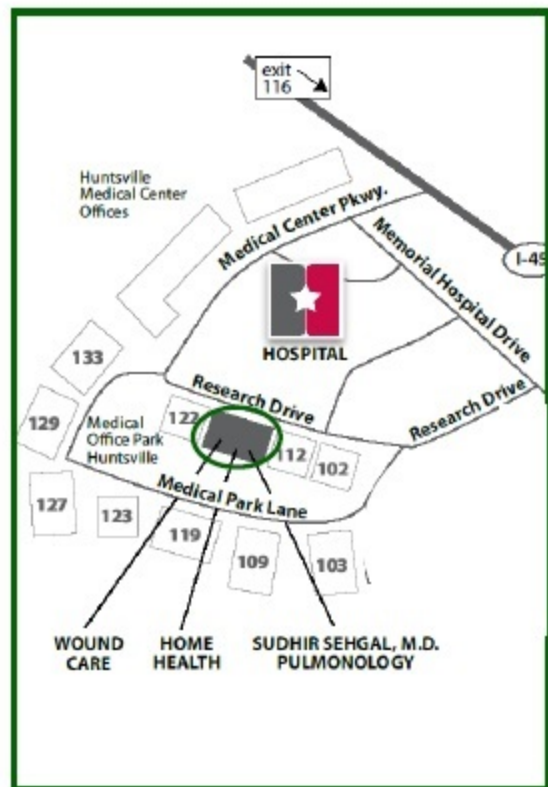

At the Huntsville Memorial Wound Care Center, we utilize the most up-to-date approaches to wound healing including hyperbaric oxygen therapy.

116C Medical Park Lane  
Huntsville, TX 77340

The treatment quickly delivers high concentrations of oxygen to the bloodstream, assists in the healing process of wounds and is effective in fighting certain types of infections.
